

FuseDocs®

Productivity, Turbocharged

Here's how one Western Australian accounting business turned a task that took 20 minutes, into one that now only takes 20 seconds.

Using FuseDocs®, the team at Omnis Group in WA have cut their report collation time down from over 20 minutes, to a matter of seconds!

We love FuseDocs – the amount of time saved on administration tasks has been amazing for our company. All you need is click a button and a document that would have taken you at least 20 minutes to do is completed in a few seconds... it is just fantastic – we would highly recommend!

The average Australian Accounting business spends at least 45 minutes compiling annual financial statements and tax returns for a family group, manually locating each of the various files from directories, collating them into a PDF builder to create a single file, creating or editing bookmarks and so on.

Omnis Group, an accounting business based in Western Australia, recently implemented FuseDocs® - a fully automated solution that would reduce the administrative burden of their report compilations, all the while maintaining the personalised and professional appearance of their client report packages.

FuseDocs® is an intuitive piece of software that integrates directly with your existing client workbooks (whether they be in Excel or Word) and allows you to simply click a button, automatically locating and combining every single file, financial statement, tax return etc. into one client-ready PDF file, complete with specified bookmarks and document security.

For Omnis Group, we connected FuseDocs® directly to their Practice Management System and their Document Management System (How Now) to allow FuseDocs® to not only automatically populate the associated entities and documents included in the report package, but to also prepare a personalised table of contents page (with hyperlinks) and entity-specific dividing pages.

FuseDocs® even has the ability to add fully customised cover-pages based on your client's industry, or another distinguishing feature.

It's never been more important to ensure our teams are focusing on what matters – our clients. Why not let solutions like FuseDocs® take care of things behind the scenes, so that your advisers can focus on developing those relationships, and your administration team have more time to focus on better supporting them.
